DEEP KARMAKAR

FRONT END DEVELOPER

M. B. Road, Debendra Pally, Post: Panihati, Dist 24PGS(N), Kol: 700114

9804509545/ 9804500783 | deepkarmakar61@gmail.com

I am a professional front end developer with almost 7 years of experience. I always balance looking fresh with being effective. I love web related technologies. I am very passionate about designing interfaces while taking into consideration the latest front end trends and techniques. Love to work with team and always trying to engage myself on discursion for better outcome. I am enjoying this platform and I want to foresee myself as a full stack web developer.

KEY SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Angular, Firebase, Bootstrap, SASS, jQuery, Tailwind

CMS: WordPress theme setup and customization

Tools: GIT, SVN, GULP, Visual Studio Code

Exploring: NodeJS, Mongo, Express, React Native, AWS

PROJECTS

➢ <u>Vanguard Model Governance Tool</u>

This app is to create Models for an AI app. This is role based application, where Models can be approved and reject on hierarchy wise. Once model finally approves from Governace side it went to inventory to process further in AI model.

My Job: Figma to HTML, create reusable component, API integration, testing, code review.
Tools: React, HTML, CSS, Axios, Redux, Responsive CSS
Link: https://modelgovernanceapp.vanguard.com/

➤ Material Optimization Suite

MOS (Material Optimization Suite) is a persona-based App that provides actionable insights on supply chain and overall inventory performance, from the fundamentals of scheduling, fulfilling raw material and optimized inventory planning to recommendations on project related stock and finished goods. This web application based on java and angular. I got a chance to work from scratch to end. I was engaged from UI development to API integration including frontend project structure.

My Job: Mock up to HTML, API integration, project planning
Tools: Angular 8, HTML5, CSS3, Bootstrap, JavaScript, Git
Link: **https://material-optimization.power.ge.com/home**

➤ Enterprise Procurement System

This is an web application for procurement system based on java and angular js. I was handling the front end part of some specific module.

My Job: Mock up to HTML, integrate API based web service, bug fixing
Tools: HTML, CSS, Bootstrap, JavaScript, Angular Js, SVN
Link: **https://eprocurement.mjunction.in/EPSV2Web/**

➤ WCMP Vendor Dashboard

This is a WordPress plugin of ecommerce marketplace. I was responsible for frontend part and other user usability-oriented approach.

My Job: PSD to HTML, Responsive, jQuery, Theme compatibility, Frontend related customer support
Tools: HTML, CSS, SASS, Bootstrap, jQuery
Link: **http://wcmpdemos.com/all-in-one-demo/my-account/** (login with vendor access)

➤ Wild Angel Films

My Job: PSD to HTML, Responsive, HTML to WordPress theme, client communication
Tools: HTML, CSS, Bootstrap, jQuery, WordPress theme and plugin setup
Link: **http://wildangelfilms.com/**

➤ WC Marketplace

My Job: PSD to HTML, Avada Theme setup, create pages using Page builder,
Tools: HTML, CSS, Bootstrap, jQuery, WordPress theme and plugin setup
Link: **http://www.wc-marketplace.com/**

➤ **The MilkShake Factory**
My Job: PSD to HTML, Responsive, HTML to WordPress theme
Tools: HTML, CSS, Bootstrap, jQuery, WordPress theme and plugin setup
Link: https://www.themilkshakefactory.com/

Apart from office projects these are the below project made by myself.

1. **weather application** Here I have used Anguar, Openweathermap API, Highcharts, HTML Geolocation API
Link: https://deepkarmakar.github.io/ng-weather

2. **Poll application** with React and firebase. Here user can create poll and share the link. There is a result page where we can get the final result.
Link: https://github.com/DeepKarmakar/Lets-Poll

3. **Split Buddy** with React native and firebase. This is hybrid android app to manage and split the expense between the members.
Link: https://github.com/DeepKarmakar/splitBuddy/tree/master

4. **React Press**, Here I'm trying to build an application like WordPress with Mongo, Express, React, NodeJS, where user will be able to create Post and Pages from backend and publish them.
